

"To build a resilient Damascus that proactively reduces flood risk, adapts to changing watershed conditions, and safeguards and preserves community assets, natural systems, and future generations through coordinated planning and implementation"

Damascus is developing a Flood Resiliency Plan to better understand flood risks and identify practical solutions that protect:

- Homes and neighborhoods
- Businesses and local jobs
- Roads and infrastructure
- Natural areas and waterways
- Public health and safety

Planning ahead helps us:

- Reduce property damage
- Improve emergency response
- Protect vulnerable residents
- Save taxpayer dollars
- Build long-term community resilience

What Are We Doing?

We are:

- Conducting a flood risk assessment
- Identifying high-risk areas
- Engaging residents and stakeholders
- Exploring nature-based and infrastructure solutions
- Prioritizing resilience projects
